REPORT OF SUPERVISOR FOR 1893.

Our school managers for the past two or three years have experienced much inconvenience from the lack of adequate school room to accommodate our village scholars. Schools have been overcrowded, and improvement in grading largely prevented. By the appropriation of last March the two Primary School buildings were raised and a room added to each. They were ready for occupancy at the beginning of the school year in September.

On entering upon my duties I found the grade in a very mixed condition, the cause for which, I ascribe largely to the lack of room above mentioned. This disarrangement was noticeable principally in the High School and between the Primary and Intermediate grades. In the latter grades I found more advanced scholars, in several instances, in the Primary than in the Intermediate; while in the High School the class about to graduate, and the class entering the September previous, were the only ones confining themselves to a regular course. The two intervening classes were run-

ning in a go-as-you-please manner.

It was also observable that the High School teacher was crowded with work, carrying on a four years course—making four distinct classes—while all other rooms in the grade had but a two years' course to handle. There were some seventeen or eighteen recitations there, while similar schools over the State are carrying only from six to ten recitations daily. The inconsistency of this is very apparent, for it is a recognized fact by teachers and school officers that High School scholars need more time than those in lower schools, instead of less, to devote to each recitation. The reason is obvious: The subjects studied are broader, the reasoning faculty of the student is better developed, and discussions of lessons, therefore, more necessary than at an earlier age. From the experience and observation of the Spring term I took the teachers into consultation and prepared such a grade, as, in our opinion, would make the schools in number of scholars nearly equal, collect those running a random course into a systematic classing, and generally do more and better work. The scholars who would have advanced to the lower room in the High School Building were held in the new rooms, and the more advanced ones from the Primary department added to them, making an Intermediate room on each side of the Harbor, between the Primary and Third Grammar Schools. The three Grammar divisions were advanced in grade one year, thereby holding all scholars in the room where they were attending for an additional year, and clipping one year from the course of the High School. Most of the teachers who taught under the previous grading last Spring, have been retained through the Fall and Winter terms, and they, with the best opportunities for knowledge in the matter, are of one opinion that the grade at present is an improvement. As a matter for parents to make reference; And also as the best means of preservation, the entire grade here follows:

PRIMARY DEPARTMENT.

LOWER ROOMS,

EAST AND WEST.

Finish First and Second Readers.

Finish Speller to part II.

 Number Work: $\left\{ \begin{array}{l} \text{Addition.} \\ \text{Subtraction.} \\ \text{Multiplication} \end{array} \right.$

Multiplication Tables.

Geography—orally.

Scholars will be advanced to the Intermediate School annually in September, on the completion of above work regardless of amount of time devoted to it.

INTERMEDIATE DEPARTMENT.

UPPER ROOMS.

EAST AND WEST.

First Year.

Third Reader.

Spelling.

First Geography to Europe.

 Arithmetic $\left\{ \begin{array}{l} \text{Long and Short Division.} \\ \text{G. C. Divisor and L. C. Multiple.} \end{array} \right.$
Second Year.

Third Reader.

Spelling.

Geography—complete and review

 Arithmetic: $\left\{ \begin{array}{l} \text{Factoring.} \\ \text{Common Factors} \\ \text{Cancellation,} \\ \text{Fractions.} \end{array} \right.$

THIRD GRAMMAR.

First Year.

Third Reader.

Spelling—orally and written.

 Arithmetic: $\left\{ \begin{array}{l} \text{Fractions.} \\ \text{Decimals.} \end{array} \right.$

Geography—review first Book and begin Second.

First Histor_.

Second Year.

Fourth Reader.

Spelling—written.

First Grammar—begin.

Second Arithmetic—to Denominate Numbers.

Geography—to S.America.

History.

SECOND GRAMMAR.

First Year.

Fourth Reader.

Spelling—written.

Arithmetic—Denominate Numbers to Percentage.

First Grammar—finish and review.

Geography—S. America to Africa.

First History—finish and review.

Second Year.

Fourth Reader.

Spelling—written.

Arithmetic—Percentage to Interest.

Large Grammar—to Syntax.

Geography—finish and review.

Primary History—two terms.

Fggleston's History—third term.

FIRST GRAMMAR.

First Year.

Arithmetic—Interest to Analysis.

Grammar—Finish and take Analysis.

History—Intercolonial War to Civil.

Physiology.

Fifth Reader.

Spelling—written.

Second Year.

FALL TERM: Arithmetic—finish.

Analysis.

History—Civil War.

Physiology—review.

Reading—supplementary.

Spelling—written.

WINTER TERM: Arithmetic—review.

Analysis.

History—finish and review.

Rhetoric.

Reading—supplementary.

Spelling—written.

SPRING TERM: Arithmetic—review.

Analysis.

History—review.

Rhetoric.

Reading—supplementary.

Spelling—written.

HIGH SCHOOL.

COLLEGE PREPARATORY COURSE.

First Year.

FALL TERM: Algebra, Physics, Latin.

WINTER TERM: Latin, Physics, Greek.

SPRING TERM: Cesar, Greek, Mathematical Review.

Second Year.

FALL TERM: Cesar, Geometry, Anabasis.

WINTER TERM: Cicero, Geometry, Anabasis.

SPRING TERM: Cicero, Geometry, Anabasis, Civil Government.

Third Year.

FALL TERM: Civil Government, Homer: Virgil, Latin Prose.

WINTER TERM: Homer, Virgil, Greek Prose.

SPRING TERM: Virgil, Greek Review, Mathematical Review.

CLASSICAL COURSE.

This Course will run the same as the Preparatory with French substituted for Greek.

ENGLISH COURSE.

This Course will require a satisfactory examination in what is required for admission to the Vaine State College, which consists of Arithmetic, Geography, English Grammar (especial attention being given to Orthography, Punctuation and Capitals) History of the United States, Physical Geography, Book Keeping, Algebra to Logarithms and Plane Geometry.

I made the following rule for the teachers to confine themselves to in examination of scholars for advancement in the grade :

“A strict system of ranking for admission and advancement will be adhered to, and an allowance of ten per cent. will be given any scholar who from any cause may fall below the standard—a conditional admission or advancement being granted. Scholars failing to pass examination at the close of the term must submit to the same examination at the beginning of the next term before proceeding further.”

This rule, strictly and impartially enforced, will work no injustice to anyone, and is only justice to average or advanced scholars,—for they should not be retarded in their work by a small minority who cannot or do not keep up.

Teachers for the Year.

HIGH SCHOOL.

Edgar W. Simpson, Newcastle, Spring and Fall.

H. C. Fabyan, Portland, Winter.

FIRST GRAMMAR.

Miss Estelle Webber, Round Pond, for the year.

SECOND GRAMMAR.

Miss Sophie G. McKown, Boothbay Harbor, Spring and Fall.

“ Annie A. Huff, Edgecomb, Winter.

THIRD GRAMMAR.

Miss Alice N. Benner, Waldoboro, for the year.

WEST INTERMEDIATE.

Miss A. Augusta Blake, Boothbay Harbor, for the year.

WEST PRIMARY.

Miss Addie B. Baker, Boothbay Harbor, for the year.

EAST INTERMEDIATE.

Miss Abbie F. Storer, Waldoboro, Fall and Winter. (the above school was started in September.)

EAST PRIMARY.

Miss Abbie F. Storer, Waldoboro, Spring.

“ Mary E. Carlisle, Boothbay Harbor, Fall and Winter.

WEST HARBOR—Ungraded

Miss Nettie Carlisle, Boothbay Harbor, Spring and Fall.

“ Sophie G. McKown, Boothbay Harbor, Winter.

No. 8—Ungraded.

Miss Annie A. Huff, Edgecomb, Spring and Fall.

“ Bessie Reed, Boothbay Harbor, Winter.

Scholars and Attendance.

Whole number in town drawing school money 583.

TABLE OF ATTENDANCE—SPRING AND FALL TERMS:

School	Spring Term		Fall Term	
	Registered No. Scholars	Average No.	Registered No. Scholars	Average No.
High	37 . . .	30 . . .	29 . . .	26.73 . .
1st Grammar . .	37 . . .	25.4 . .	28 . . .	27
2d Grammar . .	47 . . .	35 . . .	45 . . .	40
3d Grammar . .	48 . . .	37 . . .	50 . . .	46
West Int. . . .	32 . . .	24 . . .	36 . . .	33
“ Prim.	40 . . .	33 . . .	45 . . .	40
East Int. . . .	—	—	32 . . .	29
“ Prim.	62 . . .	45 . . .	35 . . .	31
West Harbor. .	45 . . .	35 . . .	43 . . .	36
No. 8	21 . . .	16 . . .	24 . . .	21

By the above table it will be noticed that the average attendance was exceptionally good at the Fall terms, and fell off badly in the Spring. This was almost entirely due to the breaking out of the measles at that time. 328 weeks school will have been taught, when the Winter terms are finished, against 280 in 1892, 275 in 1891, 264 in 1890, 241 in 1889.

Tuition Paid to Town of Boothbay.

After the division of the town in February, 1889, some arrangement was necessary for inter-attendance between towns in the districts which came partly in each town. By an apportionment in 1889, and since that date by contract or terms between the Supervisors of the towns arranging tuition this has been carried on. I noted on assuming charge of the schools what I considered a very loose trade on the part of our town. All scholars within the bounds of former district lines were permitted to attend as formerly, and tuition should be paid for the entire term of school if a scholar attended two or more weeks. This was perfectly fair had the inter-attendance been equal numerically, but our town scholars were attending their

schools largely in excess of theirs in our schools. Evidently it was inequitable to us. I therefore insisted on these modifications of the former agreement with Boothbay: first that no scholar attend out of town, and have his tuition paid by the town, except on written permission of the Supervisor of the town wherein he resided. Secondly, an agreement was made by which the tuition paid would very nearly correspond with the actual attendance of the scholar. Below I give the result of this arrangement with former years:

1889	Paid Boothbay tuition	\$279.52
1890	“ “ “	271.92
1891	“ “ “	272.52
1892	“ “ “	231.00
1893	“ “ “	156.75

It may be urged that we received some tuition from Boothbay during these years. There have been small receipts each year until the present. Such receipts have, however, been a cost in excess of receipts each year. Last year receipts from Boothbay had dwindled to \$36.00 which was almost wholly obtained in No. 12, where, to obtain it, we run schools at an expense of \$107.25. The past year I gave free use of the house there to Boothbay for school purposes and paid out \$7.20 tuition for the only two scholars there belonging to us. In the matter of being able to make a still further saving in amount of tuition for attending school out of town I have no doubt. An article is inserted in the warrant this year to see what action the town will take in regard to building a sidewalk across the meadow, so called. By this means all scholars living on the road leading to the Center as far as and including the houses of N. C. Reed and Wesley Reed can conveniently attend our schools making, thereby, a further saving to the town of about \$40.00 per year. This could virtually be termed net cash earnings to this town of such a sidewalk annually.

Inconvenience in No. 8.

This district is badly proportioned. It extends from the end of McKown's Point to Sawyers Island Bridge, with a branch road running from the former location of the schoolhouse to the Center. The largest number of scholars registered there the past year have been 24. The amount of tuition paid to Boothbay from that neighborhood for attendance at Sawyers Island School the past year \$28.95. Thus it may be observed that the number of scholars are not large nor is the expense of tuition from that locality. Why I am thus explicit is that I have received information that an article is to be inserted by petition to see what action the town will take in regard to building a new schoolhouse, or removing the present one to a location whereby the northern portion of that neighborhood may be better accommodated. That is a matter that should be considered carefully, and as the town holds all school property any changes in it rest wholly upon the action of its meetings. A greater hardship rests upon the northern portion of that neighborhood, in the matter of schools, than any other section of our town. The distance is great to our schoolhouse, and paying tuition for them to attend at Sawyers Island School does not give them either the advantages in amount of schooling that our scholars get who attend at home, or those we send to Boothbay Center School, though the new law will somewhat modify this condition.

Care of School Property.

A new plan for care of property at the village has been adopted. The labor of caring for the three buildings is let to a Janitor who takes entire charge. Mr. W. F. Buker was given the position last Spring, for the year, for the sum of \$200. It will come slightly within the amount paid heretofore by parcelling out the separate portions of work. It is a saving in fuel, keeps school property in better and cleaner condi-

tion, and it would be my recommendation to never return to the former plan.

Progress of the Schools.

Last June was graduated a Class of five from the High School consisting of Misses C. Dora Nickerson, Anna B. Kendrick, Anna M. Albee, Mary E. Carlisle and Mr. Geo. K. Blair.

Hereafter I would recommend that graduations take place, with exercises, by the First Grammar School as well as from the various classes of the High School.

All the schools have gone along in a very satisfactory manner with the exception of the Second Grammar. A band of boys in that room have made little progress for sometime past. Confederated together they perceptibly grew worse each successive term, and they were becoming an annoying element to the other rooms. It was nearly impossible to preserve order and a part of the trouble could reasonably be laid to the seats which were originally for primary scholars. These scholars were from 13 to 15 years of age, and to occupy such seats became almost a punishment. At my recommendation the Selectmen purchased seats for the room to be paid for the next fiscal year. With these seats to begin the Winter term I made the further change (believing a radical one necessary) of teachers. Part of the difficulty at once subsided, but insubordination was still cropping out. Early in the term I expelled one scholar whom I considered most at fault, since which time the school has run admirably, which cannot be said of it for some time in the past.

Much improvement is noted since the commencement of last Fall terms in the Primary and Intermediate grades. The division of the schools into reasonably sized bodies is marked by quick advancement. Cutting down the four years' course to three in the High School is also showing better work.

Truancy.

This is the most perplexing subject School Officers have to deal with. In Mr. M. D. McKown as officer we have had good and ready service whenever notified. My years' experience demonstrates one thing very satisfactorily to me, and that is: that the parents are almost wholly at fault. My predecessors

in office I observe have, as a rule, in the School report made an appeal to the intelligence of such parents. In what contact I have had with them it is a quality I have failed to recognize. I have, however, found them thoroughly informed on one subject: the evasion of the truant law. Their knowledge on this subject would do credit to an Attorney. These instances have been few but aggravating. I only know of one rule, and that is, to keep the law in mind and deal with each case, as best you can, according to its conditions.

School Appliances.

The Schools I found in a very needy condition for means of demonstrating what was being taught in them. I have furnished the High School with a Terrestrial Globe and set of Chambers Cyclopaedias; First Grammar a Chart Manikin for physiology class, and Unabridged Dictionary; Second Grammar, Globe, Dictionary and Map; Third Grammar, Globe and Dictionary; West Harbor, Globe, Dictionary and Map; No. 8, Globe, Dictionary and Map. In this connection will state that Mr. Nicholas Patterson, Cincinnati, presented West Harbor School with bell, paying all expenses for hanging etc.

Recommendations.

I will make the following recommendation for the ensuing year, the first three to the Committee who will succeed to school management, and the fourth to the action of the next annual Town Meeting.

First.—Establish a School year of 33 weeks, divided into three equal terms.

Second.—Suspend for one year, as the new law permits a Committee to do, the School in No. 12, so called.

Third.—Continue the Harbor School property in the care of a Janitor as at present.

Fourth.—Appropriations for Ensuing Year:

REPORT OF

Selectmen on Water Works Construction.

At the annual town meeting March 5, 1894, it was voted that Selectmen be authorized to construct a system of water works for the town, with suitable and sufficient pumping station, standpipe, at least 12,500 feet of water mains and 25 hydrants providing the same can be constructed at an expense not exceeding \$25,000.

We realized at the time that this vote would add very much to the duties of the Selectmen, but we were elected and sworn to do our duty, and as this was a vote of the town we tried to carry it out, as we do all other votes passed at our annual meetings. We first secured the services of three competent engineers to look over the different sources of supply, such as Mountain Ice Pond, Lewis Pond, Echo Lake and the Aulds Springs. All of these were pronounced insufficient. We next went to Adams Pond, which they all said was the only place we had to take water from, to be sure of a sufficient supply of pure water. And we herewith append Mr. E. H. Gowing's report:

E. H. GOWING }
ENGINEER }
Boston, Mass. }

BOARD OF SELECTMEN,
Boothbay Harbor, Maine.

Dear Sirs:—

I beg to submit the following report concerning a system of water works for the town of Boothbay Harbor,

The following sources of supply were investigated: Dexter Pond, Lewis Pond, some springs near Park st. and Adams Pond.

The supply from Dexter Pond is reported to be of fair quality during the greater part of the year, but parties who have used it, state that in the summer months it is so badly discolored as to render it unfit for drinking, cooking or washing. This is what the writer would expect on account of the large amount of vegetable matter on the bottom and the comparatively shallow depth of the pond. Were other conditions favorable, it might be feasible to purify this water, or to remove the vegetable matter from the pond. Either of these plans would entail large expense however.

The amount of water flowing from the pond, which is as good an indication as any of the amount which can be obtained, was at the time of the writer's visit but very little, if any more than the daily requirement of your town. The fact that the supply is no greater at this season of the year, would indicate that during the season of low water, either in summer or winter, the supply would be entirely inadequate. This is borne out by the statement of a party living near the outlet, who states that he has known the stream running from the pond, to be dry in the summer time. This pond is apparently a basin near the top of a hill with a rocky impervious bottom, which collects and holds the rain-fall from a very limited water shed and you would find upon taking from it an amount each day sufficient for the needs of your community, that you would draw the water down very rapidly, and that none would run in to take its place.

To sum up: The quality is poor and the quantity limited and this pond must be rejected as a source of supply for the town.

While the writer knows less regarding the quality of the water from Lewis Pond, it is still certain that this source would have to be rejected on account of the limited quantity which it can supply.

The quality of water from the springs is reported to be good, but they give no evidence of being able to supply even a tenth of the water which the town would use. The flow from the springs is very small and the area drained by them insufficient to warrant any more water than the visible flow. It is the opinion of the writer that any money spent in developing the springs with a view to obtain more water, will be simply wasted.

The remaining source, Adams Pond, is of considerable area itself and drains a water-shed very much larger than the three other sources combined, and the size of the stream flowing from the pond, shows that a large amount of water could be taken from it without materially reducing the level. The quality also appears to be above the average.

The only objection to this source appears to be its distance from

the town. The use of this source would necessitate the location of a pumping station at the pond, laying of a force main from thence to the stand pipe and distribution mains through the village.

The writer has made an estimate of the cost of a system made up of 6, 8, and 10 inch pipe, located as follows:

From the pumping station at Adams Pond to the corner of Union st., and Townsend ave., 8 inch pipe.

From the stand pipe on Mount Pisgah to a point on Commercial st., opposite Boothbay House, 10 inch pipe.

From the corner of Union and Atlantic sts. on Atlantic st. to High st., 8 inch pipe.

Atlantic st., from High st. to Nickersons' wharf, 6 inch pipe.

This system would give ample fire protection for the business part of the town, and that is the part which needs it most and with a good supply of hose, the houses on the side streets would also get the protection due from one or two fire streams.

In case a system was put in, on this plan extensions could be made in the near future to all the cross and side streets so that ultimately the whole town would be covered by the distribution mains and a first class fire service given on all streets.

In introducing this plant, would recommend that the strictest economy, consistent with the objects obtained, namely a plentiful supply of pure water for domestic purposes and an efficient fire service, be practiced.

The sizes of pipe referred to above are as small as it would pay you to consider, on Atlantic st, it would be desirable if possible, to extend the 8 inch farther than to High st. In pumping machinery, would recommend the purchase of a simple non-condensing pump, having a capacity of one half million gallons per day with an upright boiler to run it. As soon as you could afford the necessary expense, a larger and higher class pump should be obtained, leaving the original pump, for reserve in case of a break down. The pumping station could be built cheaply with the idea of replacing it as soon as the better structure could be afforded.

E. H. GOWING.

We then advertised for proposals for furnishing cast iron water pipe, also for trenching and laying. We received six bids, Moore & Co. of Boston, being the lowest bidders, and as we found by making inquiries that they were responsible parties, we awarded the contract to them. We herewith.

present you with a true copy of the advertisement and contract :

ADVERTISMENT.

TO CONTRACTORS:

Sealed proposals for laying cast iron water pipe, addressed to CHAS. J. MARR, CHAIRMAN OF THE BOARD OF SELECTMEN, BOOTHBAY HARBOR, MAINE, and endorsed "Proposals for laying water pipe," will be received by the Selectmen of the Town of Boothbay Harbor, Maine, until noon of.....the.....day of..... 1894.

Bidders must personally inspect the work to be done and acquaint themselves with all the requirements and contingencies affecting the same.

The estimate of work to be done on which the bids will be compared, as follows:

Laying	50 feet of	4 inch	pipe in	blow offs.
	2700	" "	6 inch	" "
	11625	" "	8 inch	" "
	4000	" "	10 inch	" "

Setting 20 hydrants.

"	5	4 inch	gates,	with	boxes.
"	10	6 inch	"	"	"
"	5	8 inch	"	"	"
"	5	10 inch	"	"	"

Excavating 500 yds. of rock.

The foregoing estimated quantities are approximate only, and the right is reserved to increase, diminish or entirely omit the same, as may be found necessary.

Each bid must be accompanied by a Cashier's or certified check for five hundred (500) dollars made payable to CHARLES F. KENNISTON, Treasurer of the Town of Boothbay Harbor. The said check to be returned to the bidder, in case his bid is not accepted.

All bids must be made upon the blank forms herewith.

The prices must be written in words, and also stated in figures. All bids will be considered as informal, that do not contain prices set opposite each and all the items, which are called for in the printed form.

The successful bidder will be required to execute a contract of the form appended, within ten days of notice of the acceptance of his

bid, and in case of failure to do so, the check accompanying his bid will be forfeited, as liquidated damages for such failure. The successful bidder will furnish a bond, in such sum and with such sureties, as may be approved, conditioned upon the faithful performance of the contract. The amount of the bond not to exceed one-third the amount of the contract.

The successful bidder must take out an "Employers Liability" and "Outside Public Liability" policy in some approved Employers Liability Insurance Co., with a limit of not less than \$5000 for any one person or \$10,000 for any one accident.

Bidders must furnish evidence of their experience, and their ability to perform the work, by reference to parties for whom similar work has been done, within the past three years.

The right is reserved to reject any and all bids should it be deemed for the interest of the Town of Boothbay Harbor, so to do.

SPECIFICATIONS.

All pipe, special castings, gates, gate boxes and hydrants will be delivered to the Contractor f. o. b. wharf at Boothbay Harbor, Maine. The cost of handling after delivery, and all other expenses of labor, materials, tools, etc., incurred in laying of said pipes, gates, hydrants and appurtenances shall be borne by the Contractor.

The Contractor shall be responsible for any loss incurred or any damages done to any pipes or appurtenances, from the time of delivery until laid and covered.

No pipes or appurtenances shall be laid or used which are known, or may be found, to be in any way defective.

Trenches for the pipes shall be opened in accordance with the directions given by the Engineer.

The pipes are to be laid in such locations and upon such lines and grades as the Engineer shall designate.

All pipes with the exception of those laid in fields and across streams, will be buried to such a depth that the top of the pipe shall be five feet below the surface of the street at the pipe line; through fields this depth will be reduced to three feet; across streams pipe will be laid on or just beneath the bottom.

Each hydrant shall be set on a large flat stone, and is to be surrounded with well bedded cobble-stones.

The excavation is to be classed either under the head of "earth"

or "rock;" the latter to include all hard rock found in masses of one-half ($1\frac{1}{2}$) cubic yard or more.

All other material found in excavation, however hard, stiff and compact, including soft and disintegrated rock, which may be easily removed with a pick, shall be classed as earth.

Where rock is encountered it shall be uncovered, measured by the Engineer and unless otherwise ordered in writing it shall be excavated to width of two and one-half ($2\frac{1}{2}$) feet greater than the diameter of the pipe to be laid therein and to a depth of six (6) inches below the grade line of the bottom of the pipe, and the Contractor will be paid for this width and depth only.

The pipes and castings when laid shall conform accurately to the lines and grades required, and castings designed for particular places shall be used therein.

All fixtures pertaining to the supply or distribution, shall be set or laid at required points, in such manner as the Engineer may direct.

Any omission of branches, stop-valves or other appurtenances intended to be laid, shall be corrected when required by reopening the trench, if it has been filled up, and introducing what may have been omitted.

When pipes are laid, the spigots shall be so adjusted in the sockets as to give a uniform space all round.

The joints shall be run with best quality, pure, soft, pig lead to a depth of not less than $1\frac{1}{2}$ inches. The gasket packing shall be clean, s and hemp or jute yarn, braided or twisted and tightly driven.

Before running the joints shall be carefully wiped out clean and dry. The joints they shall be run full at one pouring, and the melting pot shall be kept within a reasonable distance of the joint about to be run. The joints shall be caulked by competent mechanics in such a manner as to secure a tight joint, without straining the socket.

The pipes and other castings, shall, as they are laid, be carefully swept and cleaned of any earth or rubbish which may have found place inside during, or before, the operation of laying. Every open end of the pipe shall be plugged, or otherwise securely closed, before leaving the work at night.

Measurements for payment for pipe laying will be the actual lineal measurements along the centre of the pipe after it is laid, and in case of branches, as starting from the centre of the main pipe. An allowance of one foot of pipe shall be made for each plugged branch.

The prices on above measurements, are to be in full for all labor

and materials required, for laying pipe and special castings under these specifications.

Whenever it may be necessary to cross or interfere with existing culverts, drains, sewers, water pipes or fixtures, or other structures needing special care, notice shall be given at once to the Engineer and the work shall be done according to his directions. Any damage caused shall be thoroughly repaired.

If so directed by the Engineer, the location of any existing works shall be changed to meet the requirements of the pipe laying, and new works shall be added when necessary, to leave all in good working order. All the cost of doing any of the work above indicated is to be included in the prices bid for items herein specified, notwithstanding the location of said works may not be on record.

The Contractor shall keep the streets and highways, in which he may be at work, open for carriages to pass, so far as practicable, and shall conduct his work for this object in such manner as the Engineer may, from time to time, direct. No sidewalks shall be obstructed where it is possible to avoid it.

The Contractor shall put up and maintain such barriers and lights, as will effectually prevent any accident, for which the Town of Boothbay Harbor might be liable, in consequence of his occupation of the streets and the Contractor shall be liable for all damages occasioned by his act or neglect or that of his agents, employes or workmen.

Any unfaithful or imperfect work that may be discovered, before the final acceptance of the work, shall be corrected immediately on the requirement of the Engineer, notwithstanding it may have been overlooked by the proper Inspector, and measured.

The Contractor shall keep the work in good repair for six months after its completion and shall correct and repair promptly during that time, all leaks and failures of whatever description, and all settlements and irregularities of paving or other surfacing and any imperfect work upon sewers or drains, and shall deliver the work in all respects, in good condition at the end of that time. If at any time before the end of six months from the time the final payment is made, any portion of the works, or the surfacing of any street or highway on the line of the works, shall, in the opinion of the Engineer, require repairs, in consequence of the want of thoroughness or faithfulness on the part of the Contractor, in the execution of the work, and the Engineer shall notify said Contractor to make the repairs so required, and if the said Contractor shall neglect to make such repairs to the

satisfaction of the Engineer, within three days, from the date of the service of such notice, then the Engineer shall have the right to employ such other persons, as he may deem proper, to make the said repairs at the expense of the said Contractor.

The price bid for each item is to include the cost of all work and material incidental thereto, such as baling, pumping and draining water, furnishing all necessary tools, lead and yarn, furnishing, erecting and removing shoring and bracing wherever required etc., etc.

In all operations connected with the work herein specified, all existing ordinances, and all laws controlling or limiting in any way the actions of those engaged on the work, or affecting the materials used, must be respected and strictly complied with.

All directions and instruction will be given by the Engineer of the water works for the time being, or his authorized assistant; and he shall have it in his power to make such changes in the form, dimensions, grades and alignments of the work, as shall seem to be required. If any such changes are made after the commencement of any particular piece of work, and the cost be increased thereby, the Engineer shall allow such an amount as in his judgement he considers to be fair and equitable, as between the parties.

The Engineer is to make all measurements, and to decide as to the amount or the quantity of the several kinds of work, and as to the quality of all material.

The Engineer shall decide as to the meaning and intent of any portion of these specifications, where the same may be found obscure, and he shall have the right to correct any errors or omissions in them, when such correction is necessary for the proper fulfilment of their intention; the action of such correction to date from the time the Engineer gives due notice thereof. In case the Contractor suspects any possible difference of opinion between himself and the Engineer as to the meaning of any part of the specifications, he must ascertain the Engineer's understanding of it.

The Engineer's decision as to any of the foregoing matter shall be final and binding upon the parties hereto.

These specifications are intended to cover the completion of the work fit for use, except for items specially excluded herein, and the Contractor shall do all work and furnish all materials to that end, except as above stated.

No claims for extra work shall be made unless the same shall be done in pursuance of a written order from the Engineer. The value of any extra work is to be determined by the Engineer.

Any omission to disapprove of any work by the Engineer at the time of a monthly, or other estimate shall not be construed to be an acceptance of any faulty or defective work.

The Contractor shall discharge, whenever required so to do by the Engineer, any incompetent or disorderly person; and such person shall not be employed again upon the works.

CONTRACT.

Articles of Agreement made and concluded this nineteenth day of June A. D. 1894, by and between the inhabitants of the Town of Boothbay Harbor, in the County of Lincoln and State of Maine, in their corporate capacity as a Town, hereinafter called the Town, of the one part, and J. J. Moore of Hingham, Mass., and E. H. Gowing of Reading, Mass., Copartners doing business under the firm name of Moore & Co., of Boston, Massachusetts, hereinafter called the Contractor, of the other part.

Now this writing witnesseth that the said parties hereto, each in consideration of the covenants and agreements herein recited, to be kept and performed on the part of the other, have mutually covenanted and agreed, each with the other, as follows, namely:—

ARTICLE I. That the said Contractor shall and will, at his own proper cost and expense, in a good and workmanlike manner, according to the best of his art and ability, and in accordance with the specifications hereto attached and hereby made a part of this agreement, and the plans and directions made and to be made from time to time as the work proceeds, do and perform all the work and furnish all the materials which may be required for laying the main and distribution pipe of the Town of Boothbay Harbor except as in the said specifications otherwise provided.

ARTICLE II. And further, that the said Contractor will give his personal attention to the fulfilment of this agreement; and will not let, assign or transfer or sub-let the work to be done under this agreement, without the consent of the said Town in writing endorsed hereon; that he will begin work as soon as the materials to be furnished by the said Town shall be delivered to him and diligently prosecute the same to its completion on or before the First day of October 1894.

ARTICLE III. And further, that the said Contractor shall not be entitled to demand or receive payment for any portion of the work to be done under this agreement except in the manner herein set forth.

ARTICLE IV. And further, that whereas the estimated quantities of work to be done under this agreement are approximate only, the said Town may increase or diminish the same as may be deemed

necessary, which increase or diminution shall not in any way vitiate this agreement or give cause for claims for damages.

ARTICLE V. And further, that the said Town may appoint such Engineer and Inspectors under him, as they may deem proper, to inspect the work to be done under this agreement, and that the said Engineer or Inspectors, shall be at liberty at all times to inspect the work.

ARTICLE VI. And further, that to prevent dispute and litigation, it is expressly agreed that the said Engineer shall in all cases, determine the amount or the quantity of the several kinds of work or material to be paid for under this agreement; and the said Engineer shall decide all questions which may arise in relation to the execution of this agreement, and his estimates and decisions shall be final and conclusive.

ARTICLE VII. And further, that the said Engineer may either before or after commencement of construction, make alterations, in the line, grade, plans, position or any portion thereof and these alterations shall not vitiate this agreement or give cause for claims for damages.

ARTICLE VIII. And further, that the inspection of the work to be done and the material to be furnished under this agreement, shall in no wise relieve the said Contractor from his obligation to furnish standard material and workmanship.

ARTICLE IX. And further, that the said Contractor will indemnify and save harmless, the said Town, from all claims against the said Town, from municipal or private corporations or individuals, for damages of any kind caused by the construction of said work, or the occupation of the streets and highways of Boothbay Harbor.

ARTICLE X. And further, that with the exception of such corrections as the said Engineer is entitled to make, the terms and conditions of this agreement, or any one of them, cannot be dispensed with or rendered in any sense null or void, without the written consent of the parties hereto, endorsed hereon, specifying what modifications may have been agreed upon.

ARTICLE XI. And further, that the said Town will pay and the said Contractor will receive, the following sums as full compensation for the work to be done and the materials to be furnished under this agreement, namely:—

For laying 4 inch cast iron water pipe, and doing all work incidental thereto, the sum of twenty-four (24) cents per lineal foot.

For laying 6 inch cast iron water pipe, and doing all work

incidental thereto, the sum of twenty-four (24) cents per lineal foot.

For laying 8 inch cast iron water pipe, and doing all work incidental thereto, the sum of twenty-six (26) cents per lineal foot.

For laying 10 inch cast iron water pipe, and doing all work incidental thereto, the sum of thirty (30) cents per lineal foot.

For setting all sizes of boxes, and doing all work incidental thereto, the sum of one (1) dollars each

For setting hydrants, and doing all work incidental thereto, the sum of two (2) dollars each.

For excavating rock, and doing all work incidental thereto, including the disposal of material by removal or otherwise, the sum of three and seventy-five one-hundredth (3.75) dollars per cubic yard.

For excavating extra earth, and doing all work incidental thereto, including the disposal of material by removal or otherwise, the sum of fifty (50) cents per cubic yard.

ARTICLE XII. And further, that payment will be made in the manner following, namely: On or before the tenth of each month approximate estimates of the work done during the previous month and the value thereof, according to the terms of this agreement, shall be made by the said Engineer, whereupon the said Town will pay to the said Contractor ninety per cent. of the amount of said estimates, but it is expressly understood that such estimates shall be made only when the work progresses in accordance with the provisions of this agreement; whenever, in the opinion of the said Engineer the work to be done under this agreement shall be completely performed on the part of the said Contractor, an accurate estimate of all the work done and the materials furnished, shall be made, and within thirty days from the time of the completion of the said work to be performed, the balance which shall be found to be due the said Contractor shall be paid by the said Town: provided however, the said Town may retain out of the said balance due a sum not to exceed three hundred (300) dollars till the expiration of six months from the date of the completion of the work, which said sum, less any expense incurred in making good any defective work which may be discovered during the said period, the said Town shall at the expiration of said period, pay to the said Contractor.

In witness whereof the said inhabitants of the Town of Boothbay Harbor, in their corporate capacity as a Town have caused their seal to be affixed and their corporate name to be signed by CHARLES J. MARR, W. HERBERT REED and THOMAS J. EMERSON, their Selectmen duly authorized therefor by vote of the said Town at a meeting held

on the fifth day of March, A. D. 1894., and the said J. J. MOORE and E. H. GOWING have set their hands and affixed their seals to these presents and one other instrument of like tenor and even date, the day and year first above written.

C. J. MARR	} <i>Selectmen of the Town</i>
W. HERBERT REED	
T. J. EMERSON	
	} <i>of</i>
	} <i>Boothbay Harbor.</i>
	J. J. MOORE
	E. H. GOWING.

FORM OF BOND.

Know all men by these presents that J. J. MOORE of Hingham, Massachusetts, and E. H. GOWING of Reading, Mass., as principals, and W. H. WHITCOMB of Norway, Maine, as sureties, are held and firmly bound unto the Town of Boothbay Harbor, Maine, in the sum of one thousand (1000) dollars, lawful money of, the United States of America, to be paid to the said Town of Boothbay Harbor, or its certain attorney, its successors and assigns, for which payments well and truly to be made, we bind ourselves, our heirs, executors, and administrators jointly and severally firmly by these presents.

Whereas the above bounden J. J. MOORE and E. H. GOWING by an instrument in writing bearing even date with these presents, have agreed to furnish certain work and material to the Town of Boothbay Harbor, on the conditions and for the consideration in the said instrument mentioned and contained and according to the specifications of the said instrument.

Now therefore the condition of this obligation is such that if the above bounden J. J. MOORE and E. H. GOWING shall well and truly keep and perform all the terms and conditions of the said instrument on their part to be kept and performed and complete the same in accordance with the terms and provisions therein stipulated, then this obligation shall be void and of no effect, otherwise to remain in full force and virtue.

In witness whereof we have hereunto set our hands and seals on this nineteenth day of June A. D. 1894,

J. J. MOORE,
E. H. GOWING,
W. H. WHITCOMB.

We had a contract drawn up with Moore & Co. that they would agree to do all the town voted to do and as much more

as could be done for the prices stated in contract, which proved to be about 2,500 feet, making in all about 15,000 feet. The Selectmen were authorized to lease said water works if they deemed it proper for a term of 20 years to any responsible water company that will agree as rental therefore to supply the town with sufficient water for 25 hydrants. We had an agreement drawn up with the Boothbay & Boothbay Harbor Water Company, that they would lease said works after the \$25,000 was expended by the town, and extend the system as follows:

On Atlantic St. to the store occupied by S. Nickerson & Sons, Townsend Avenue and Commercial St. to residence of W. M. Sawyer, McKown St. to house of Susan Chambers, West St. to residence of W. J. Winslow.

After the \$25,000 was expended we did not think it advisable to lease the works without first getting the expression of the people, so upon the application of W. M. Sawyer and nine other legal voters we called a special town meeting, on the 24th day of September with the following results: After accepting the report of the Selectmen for what they had already done, voted that the Selectmen be authorized and directed to borrow the sum of ten thousand dollars by bond or otherwise; the bonds to be of the same time and rate as the water bond issued under the vote at the annual meeting in March last. Eight thousand dollars of the above sum to be expended under the direction of the Selectmen to extend the water system as follows:

- 1st. To the McClintock store, East Side.
- 2nd. " head of Cross Street.
- 3rd. " house of Susan Chambers.
- 4th. " house of Eben Lewis, West St.
- 5th. " store of W. M. Sawyer, Commercial St.

And two thousand dollars of the above sum to be reserved for the use of a Board of Water Commissioners with

which to operate said Water Works for and in behalf of said town.

After satisfactory arrangements having been made with different firms whom we were owing for pipe and pump, we continued with the work until we were obliged to stop on account of the cold weather, and we herewith present a true statement of the water plant to date:

		_____ \$4,731.32
Due Moore & Co 10 per cent on labor, which is in- cluded in bills due.....		155.47
		_____ \$4,886.79

Water Plant to date consists of the following amount of
 pipe, hydrants and valves :

3 feet 4-inch pipe.

1369 “ 6 “

13105 “ 8 “

4053 “ 10 “

11 Gates.

16 Hydrants.

Cost of pipe, \$21.84 per ton (2240 lbs.)

It may be interesting to know how much rock has been taken out which figure 2557.82 cubic yards.

In rendering our report of the water plant we have tried to make it just as plain as we possibly could, that every taxpayer might understand it, and see for himself what every cent has been expended for. We would recommend that a committee of three be appointed to confer with Mr. Joseph Dodge and see what arrangements can be made with him in regard to taking water from Adams Pond.

C. J. MARR,	}	<i>Selectmen</i>
W. H. REED,		<i>of</i>
T. J. EMERSON,		<i>Boothbay Harbor.</i>

I have examined the bills and vouchers for the expenditure above given for Water Works Construction, and find all correct, agreeing with the report of the Board.

F. B. GREENE,
Auditor.

Boothbay Harbor, February 16th, 1895.

Record of Town Bonds.

Bond No. 25, \$500, due Jan. 1st. 1899.

“ “ 26, 500, “ “ “ 1900.

Above Bonds are at $4\frac{1}{2}$ per cent.

Bonds Nos. 6 to 10 inclusive, \$100 each, due Jan. 1st 1896.

“ “ 11 to 15 “ 100 “ “ “ “ 1897.

“ “ 16 to 19 “ 100 “ “ “ “ 1898.

Above Bonds are at 5 per cent.

NOTE.—I make my summary statement of Town Bonds and net indebtedness as in former reports. The Water Bonds, the water indebtedness above bonds, and water accounts entire, appear under that report, and the Cemetery Bond in that report, for I deem it a clearer method of presentation to report the several classes of indebtedness apart. The interest on both Town and Water Bonds is put under one head as they were both subjects of appropriation at our last annual meeting.

I have examined the records of orders drawn by the Selectmen, also the Treasurer's accounts, for the fiscal year one thousand eight hundred and ninety-four, and find the bills correctly cast and properly vouched.

F. B. GREENE,
Auditor.

Boothbay Harbor, February 16, 1895.

REPORT OF SUPERVISOR FOR 1894.

Under the School Law of 1893 which went into operation March 1st., 1894, five were elected, at our last annual town meeting, to constitute the School Board. Pursuant to the law the terms of office were determined by draft as follows :

N. S. Baker,	one	year	term.
Herman Carlisle,	two	“	“
F. B. Greene,	“	“	“
C. E. Kendrick,	three	“	“
W. H. Reed,	“	“	“

It was decided to follow the recommendation of the last report in the matter of a school year, and accordingly 33 weeks have been taught in each of the ten rooms in town, giving a total amount of 333 weeks schooling against 328 weeks in 1893, 280 in 1892, 275 in 1891, 264 in 1890 and 241 in 1889. This shows that our amount of schooling has gradually increased each year since the incorporation of our town, the last two years being nearly equal in amount, and the present year nearly 100 weeks in excess of the first year of our existence as a town.

Teachers for the Year.

HIGH SCHOOL.

H. C. Fabyan, Portland, Spring.

Fred J. Libby, Richmond, Fall and Winter.

FIRST GRAMMAR.

Miss Estelle Webber, Round Pond, for the year.

SECOND GRAMMAR.

Miss Annie A. Huff, Edgecomb, for the year.

THIRD GRAMMAR.

Miss Alice N. Benner, Waldoboro, for the year.

WEST INTERMEDIATE.

Miss A. Augusta Blake, Boothbay Harbor, Spring.

Miss Mary E. Carlisle, Boothbay Harbor, Fall and Winter.

EAST INTERMEDIATE.

Miss Abbie F. Storer, Waldoboro, for the year.

WEST PRIMARY.

Miss Addie B. Baker, Boothbay Harbor, for the year.

EAST PRIMARY.

Miss Mary E. Carlisle, Boothbay Harbor, spring.

Miss Grace D. Maddocks, Boothbay Harbor, Fall and Winter.

WEST HARBOR—Ungraded.

Miss Sophie G. McKown, Boothbay Harbor, Spring.

Miss A. Augusta Blake, Boothbay Harbor, Fall and Winter.

No. 8—Ungraded.

Miss Elizabeth F. Reed, Boothbay Harbor, Spring and Fall.

Miss Anna B. Kendrick, Boothbay Harbor, Winter.

All schools have made satisfactory advancement during the year. The Course laid out in 1893, and entered upon at the Fall term of that year, has been very closely adhered to, and a much more systematic progress has been noticeable than before. Classes are banded together, with real formality, first in the Intermediate rooms, with a two years course of study framed and hanging in each room. Then two years work is likewise laid out in each of the three Grammar Schools, the work of each room being printed, framed and hung up as in

the Intermediate. Thus all pupils become conversant with the work before them. The examinations are strictly adhered to and the instances are very few where pupils have fell behind their class and failed of advancement at the annual beginning in September. A real ambition has been generated and very good and earnest work is being done. And while very few have failed to keep up with their classes, about 20 altogether have, by study in vacation season, been able to pass the examinations and gain one year in the course. More of this extra study occurred among the 2d Grammar School pupils last summer than anywhere else, and by it the number of pupils in that room was kept down to a point within the capacity of the room. It is more likely to be crowded next Fall than any other room in town unless a similar effort is made next summer by some of the more advanced scholars. I consider the grade stimulates the pupils to both,—better attendance and greater industry.

Text Books

In this account, as Auditor, I referred by foot-note for explanation to my school report.

The year 1890 was the first for Free Text Books. That year our town appropriated \$500, all of which was expended and had the books at that time been kept as they now are an overdraw would have appeared of \$213.47, or in other words, an actual amount of \$713.47 was invested that year in new books.

On appearance of town orders it shows that the following amounts were paid for free text books for the years given:

1890	orders	drawn	for	\$500.00
1891	“	“	“	334.08
1892	“	“	“	232.98
1893	“	“	“	163.35

The year '93 was my first as Supervisor and my outlay being as above I was led to suppose that \$200 was an appro-

priation large enough to ask for, but so large a quantity of the books were absolutely worn out that the calls were greater than I had looked for. Many of the Readers, Arithmetics, Spellers and Grammars, the common English books most in use, have had to be repurchased this year. The Geographies were in a bad condition and I saw that a great many must be soon replaced by new ones. The book we were using was Harpers, and the various editions disagreed with each other. Population was based in some on the census of 1870, some 1880 and the balance 1890. A large portion of the books were 17 years old, and it would appear our town was imposed upon by the Publishing House of which they were purchased, for the life of a school book in the common schools cannot be much over five years. In consultation with the Board I decided to introduce Potters Geographies which I believe to be the most valuable work at present. There have been but few other changes, and they have occurred mostly in the High School where the classes are small and the expense light. To show the facts regarding this appropriation and the expenditure I refer you to the Auditor's account where this account is given.

Free Text Book Account at Close of Fiscal Year, February 16, 1895.

“ “ “ express on introduction,	6.00
	<hr/>
	56.00
	<hr/>
Amount actually purchased in excess of appropriation,	\$168.26

From the above and by carefully looking over our school books I have recommended raising \$400.00 this year for Free Text Books. With the unexpended balance from Repairs Account I think \$200, same amount as last year, the proper amount to raise. As the schools are now fully supplied with Dictionaries, Encyclopedias, Globes, etc., there will be no expense in these as other years, and I have therefore cut the recommendation for appropriation for schools down from \$2000 to \$1800, believing that our 33 weeks may be run on this amount. I therefore brings the recommendations to the same figures, on the total, as the appropriations in this department were in 1894.

Tuition to Town of Boothbay.

This has been one of the most disagreeable matters coming to the care of the School Board. It was so from the fact that it is very hard for children to change all their acquaintances and associations which is necessary in quitting school in one locality and commencing in another. But the division of the towns, and the several State laws which have followed fast since that occurred, among which the more prominent are those of Free Text Books and the Compulsory Town System, make it imperative on school officers, who would do their own town justice, to grant no permits to attend away from home except for the best of reasons. Where distance, age and season of the year have combined to form a sufficient reason, tuition has been paid and I think no injustice has been done. A sidewalk, asked for by the parties interested, has been built across the Meadow at an expense to the town of over \$200, but some six or seven pupils, which this was built largely to convene, still attend the Boothbay schools. I declined to pay tuition in those cases as I did not consider the reason given amounted to any more than *desire* or *wish* on the part of the parents and children to attend there, and in such cases the town should not be expected to pay the costs of mere satisfaction.

The expenses in this matter have been materially reduced the past two years. Below is a summary since town organization:

1889	Tuition paid	Boothbay	\$279.52
1890	“	“	271.95
1891	“	“	272.52
1892	“	“	231.00
1893	“	“	156.75
1894	“	“	69.00

High School

I wish at this point to draw public attention to our High School. I have paid more for teaching than in former years, from the fact that the requirements of the school made it obligatory. It has been found to be impossible to get good ability for the prices we formerly paid. Our school is made

up of very industrious and capable pupils who show by every act that they are equally aware of their position and the value of time. I feel that we have been very fortunate in obtaining instructors for the school the past two years. The classes are not now running a random course, but are well banded together in classes, in one Course or the other, all with a definite object in view. Our school, in the studies pursued in it, and the ability of the pupils, I feel positive ranks much above the average Free High School of the State. From various sources of information I am satisfied on this point. By the above table one can see that we are educating at the present 32 advanced scholars, and, had we poorer privileges at home, it can easily be estimated the cash expense of educating so many away from home. This school will be likely to be swelled to about 40 in number next September. To properly instruct that number may make it necessary to employ an assistant. If such is the case no extra expense about the building need be made, for the Board have a plan in that event, but the extra cost of an assistant will be added. As this is a matter that can not be known until the time arrives no extra appropriation is recommended.
